The fastest migration on the market

Whatever the size of your business, migrate in the most efficient way possible

SAAS Platform build on top of Azure

Improved business agility with zero local deployment

SELF SERVICE

Self-service platform

Simplifies and accelerates your purchasing process

FILE MIGRATION

Simplify and automate migration of business content using Cludiway file migration for Google Drive, OneDrive for Business and SharePoint Online

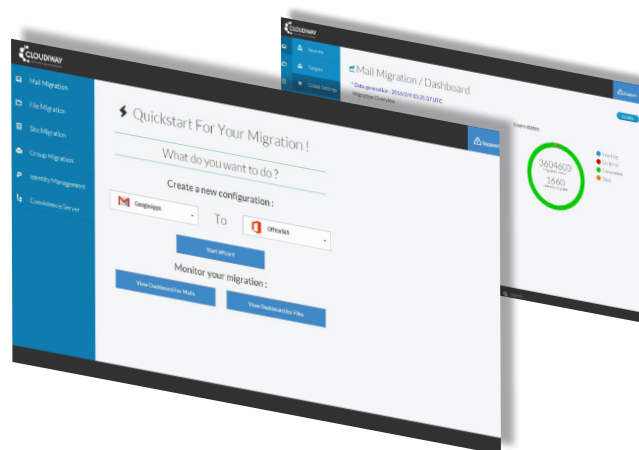

Transferring files from one cloud storage service to another might sound adventurous, but rest easy, you don't need to be an expert. Cludiway puts all of your data in one place without data degradation.

There is no hardware to deploy or software to install, simply use an internet connection and a web browser for migrating your business content. Cludiway also does the hard work for you. It preserves existing files and permissions and automatically converts document formats between Google Apps and Office 365.

What about my shared files?

Cludiway handles migration according to heterogeneous environment restrictions. Documents shared on Google Drive can be migrated to OneDrive for business or SharePoint depending on how they've been shared. We also provide flexible options to ensure files remain easy to locate.

Cludiway makes migration easy by leveraging the latest technology to drive a seamless transition without needing the credentials of all your business users.

File migration uses the same user-friendly platform as mailboxes migration so you can perform concurrent migrations to your new cloud-based system.

Simplify complex scenarios with market-leading software from Cludiway®
Our cloud-based software saves you time, money and resources
