About Cloudiway

Cloudiway develops sustainable, modern technologies to solve the world's most significant business challenges. Our success is based on our deep experience and strong know-how in data migration and enterprise coexistence between Google Workspace and Microsoft 365. In our success, we recognize employees and team achievements and create exceptional opportunities for career growth.

SaaS software editor since 2010, Cloudiway is an international company of 20 employees, offering data migration and enterprise coexistence solutions to large groups as well as to SMEs and associations.

A pioneer in supporting unique data migration scenarios, we design technically innovative products for our customers that are easy-to-use.

We are hiring a full-time .Net core engineer developer

Based in Annecy, France, you will integrate with the technical team (composed of 5 people). You will be responsible for the development and monitoring of cloud-to-cloud and on-prem-to-cloud data migration products.

Primary responsibilities are:

- Analysis of the existing product application (business constraints, ...)
- Technical design and development of the product
- Write detailed specification documents and ensure internal acceptance and documentation.
- Provide level 2 assistance to the support team.

Benefits: Luncheon vouchers (France); Family Mutual Insurance + Provident Fund (France). Health Insurance (remote).

Minimum Requirements

- A bachelor's degree in computer science or equivalent.
- Minimum 3 year's experience in similar role.
- Full skillset consisting of C#, SQL and .Net Frameworks such as Entity and Core.

- Basic knowledge of Cloud technologies: Azure, AWS, and O365.
- Experience using Docker container or microservices is a plus.
- Experience with the Kubernetes stack is ideal.

Work related skills

- A high level of autonomy (remote fulltime possible).
- Ability to learn new technologies quickly.
- Deep technical comprehension; the candidate must demonstrate an ability to quickly grasp a complex technical environment.
- Ability to propose new product features, to have a global vision and to be able to develop a product from conception to the production launch.
- Ability to meet high pressure deadlines.
- Fluent in English written and spoken (French will be a plus)
